Our kindergarten

- Stortorget is a kindergarten with three divisions.
- In our work we learn a lot about the children, about ourselves and how we work, learn and play together.
- We are working with basic values of social interaction, how to talk to each other and how you interact with other people.
- We encourage the children to become independent, to think for themselves and to make decisions of their own. We also give them time to reflect upon their own and their friends behaviour.
- We believe that we are all equal, irrespective of skin color, race, various handicaps, etc.
- This set of values is what we believe in and teach the children, in both indoor and outdoor activities.
